MAKE IT A **GLASTRON** **SUMMER**

#GLASTRONSUMMER

It's time to get out on the water and make it a Glastron summer. For over 60 years families and friends have been making memories on the most iconic boat on the water. Share with us and the rest of the boating community by tagging your memories with **#GLASTRONSUMMER**.

QUALITY CONSTRUCTION

Every Glastron boat and trailer is manufactured by hard-working, skilled technicians dedicated to over 60 years of boat building heritage. From initial prototyping to final production, every detail is taken into consideration, thoroughly researched and put through diligent testing. State of the art technology combined with tried and true methods ensure the best possible result; this will always be the Glastron standard.

COMPONENTS

The exclusive factory warranty covers material, labor, and most boat components for three years; exceptions apply. Our customer service experts use state of the art technology for claim processing; a direct link to the craftsmen/professionals that manufacture your boat. (Trailer warranty limited to one year)

OSMOSIS

A prorated warranty covers osmotic hull blistering for five years. Our engineered Vinyl Esther barrier coat has the best track record in the industry for minimizing hull blistering—a process of construction that gives you peace of mind.

HULL STRUCTURE

Lifetime structural hull or deck warranty applies to the first retail owner. A testimony of hull design and structural engineering makes the warranty transferable to the second owner; limitations apply.

Key features include diamond plate step pads, chrome rims, and standard LED submersible lighting.

Standard brakes on all axles

Fully welded, closed box construction creates a stronger trailer with less flex

Swing-away tongue for easy storage

TOW AWAY

Glastron® is one of the few recreational boat manufacturers in the world to make its own custom-matched, all-welded trailer. It lets your boat be easily launched and loaded, plus it provides great stability while towing.

SSV HULL

The legendary SSV (Super Stable Vee®) hull design is the biggest reason Glastron boats perform so well. It's quick to plane, with minimal bowrise, and tracks tight in the turns.
